

## **Union Bank rolls out mobile app**

Our Bureau

Mumbai, September 1:

Union Bank of India has launched USSD (unstructured supplementary service data) based '\*99#' mobile application on Play Store on Android platform. This '\*99#' mobile app does not require internet connectivity to perform banking and other value-added services.

The app provides basic banking transactions such as checking account balance, money transfer, and MPIN (mobile personal identification number) management. It also provides value-added services like checking Aadhaar-linked overdraft status and PMJDY account overdraft status.
