Reduced NPA to drive solvency of public sector banks, says Icra

The government's capital infusion of Rs 1.91 trillion into the PSBs during 2018 and 2019 augurs well with their growth

Anup Roy March 16, 2019 Last Updated at 00:19 IST

Credit rating agency Icra says reduced net non-

Slippages will reduce during FY20 and reach levels of 1.9-2.4%, which is acceptable

performing assets will drive "considerable improvement" in solvency of public sector banks (PSBs). Slippages will reduce during FY20 and reach levels of 1.9-2.4%, which is acceptable. The government's capital infusion of Rs 1.91 trillion into the PSBs during 2018 and 2019 augurs well with their growth, while the total capital requirement to support growth rate of 7-9% by these banks for FY20 would be Rs 54-77,000 crore, the rating agency said. Some banks can finance much of their capital needs through sale of non-core assets, whereas lower growth in credit in banks under prompt corrective action can reduce capital requirement for FY20.

Estimated capital required FY20 (₹ crore)

Bank	Value
State Bank of India	11,844
Canara	6,754
Central Bank of India	6,433
UCO Bank	5,545
